Main functions, requisites & benefits

Main functions

To reinforce the development of mounting links of our division chassis at our international location Amorebieta, as soon as possible, we are looking for a Research Manager.

Tasks:

- * (basis-) development in the field of mounting links.
- * Processing inquiries regarding feasibility studies and design and prototypes.
- * Development of system components with regard to lightweight construction through the use of new materials and production techniques, including cost-benefit analysis.
- * Creation, testing and documentation of sample and prototype parts for new products.
- * Supporting the production during the introduction of new products (industrialization).
- * Management of new parts projects.

Requisites

Qualifications:

- * Several years of professional experience in the development and design of mounting links,
- * Completed technical studies, eg in the field of mechanical engineering.
- * Experience in using the CATIA / NX CAD systems to create 3D models.
- * Independent, conscientious and systematic way of working with a high level of teamwork and communication skills.
- * Safe appearance in the dealing with suppliers and customers.
- * High level of flexibility and willingness to travel.
- * Good English knowledge.
