

Company Description

Tecnalia Corporation has been set up as a multidisciplinary Technology Corporation, of a private and independent nature, with the mission to contribute value and wealth to the society in general, and to the business base in particular, through research, technological development and innovation in an international context. The Corporation offers the people comprising it a framework for competence and professional development by generating opportunities for their professional future. Shared knowledge, making use of the potential and diversity of an eminently creative, innovative, and professional group are the principles underpinning our culture and values.

 Province: Bizkaia

 Country: Basque Country
 City: Derio

Company

Tecnalia Research and Innovation

Main functions, requisites & benefits

Main functions

The Smart Systems unit, within the Industry and Transport division, has one technological platform in computer vision (more information available at <http://computervisionbytecnalia>):

- Surface Automated Inspection and Quality Control for Industry
- Machine learning, Deep learning for classification, detection.
- Photonics, images acquiring and interpretation of non-visible channels (thermography, Raman, Libs, Multi-photon)

What do we offer?

The open position is as Project Manager within a private research center, thus driving the identification of new business opportunities, unexpressed requirements from our clients as well as definition and cost evaluation of the solution proposed in commercial offers, contributions to European projects proposals, as well as contributions to the team technological strategy and management.

The position is divided into two main roles:

- Project management: the person will be responsible for the quality assurance of the projects and the excellence of their execution (goal achievement, planning, resources, and customer satisfaction) through the leadership of mixed technical teams. One of the main targets of any Tecnalia project is the technology transfer towards the industry.
- Complex projects commercial activity: the person will belong to the sales force of the division, being hence responsible for promoting business and interacting with current and potential customers. The main duties will be: identification of customer's needs, definition of technical solutions with the support of the project team, negotiation of terms and conditions...

Who are you?

Autonomous and dedicated, you have an innovative spirit and you are eager to move next generation computer vision developments to real world applications, identifying and solving client's needs: from the first conceptual ideas to the validation in real-condition pilot prototypes.

You have proven knowledge of computer vision. You have very good communication (oral and written) skills, are problem-solving oriented and you are comfortable with teamwork, in different languages and locations.
