Main functions, requisites & benefits

Main functions

Boiler making company located in Donostialdea is looking for a Project Engineer who will be responsible for several different functions from the design of metallic structures or orders according to the customer's drawing to setting up in manufacturing. In order to do this s/he will need to be able to plan the projects, coordinating the different stages of subcontracting and workshop tasks in order to comply with the limits required by the customer. S/he will also be responsible for commercial relations with the customer from start to finish from the offer requests through to the final delivery of material within the time and quality limits established with the customer.

Requisites

Training: Mechanical Engineering Languages: Good level of French, English also highly valued. Experience: We need a person with experience in a similar area, preferably in companies in the boiler-making sector. We are looking for a person with skills in design, planning and organization, as well as the ability to relate well with both customers and suppliers.
