

Company Description

Achucarro Basque Center for Neuroscience is

- the research center fostered by Ikerbasque and the University of the Basque Country (UPV/EHU),
- devoted to the training and research in the biology of the neuron-glia interaction,
- committed to equal opportunities,
- so we can contribute, in collaboration with other agents, in the discovery of new therapies for brain diseases.

Information

Deadline: 2019-06-30
Category: Business
Province: Bizkaia

Country: Basque Country
City: Leioa

Company

Achucarro Basque Center for Neuroscience

Main functions, requisites & benefits

Main functions

ACHUCARRO is a research organisation in development so is willing to receive application from excellent scientists interested in the advance of knowledge in the field of neurobiology, and in particular on glial cells (neuron - glia interactions, microglia, astroglia / astrocytes, oligodendroglia / oligodendrocytes, etc). Researchers on any stage of their researcher career can find research groups, infrastructure and equipment to set their professional goals in our environment.

Requisites

ACHUCARRO is not a general neuroscience research organisation so we are looking for people with some experience on glial cell research. Best candidates will have a strong background in brain biology and use of usual methodologies and equipment for gene, molecular and cell biology in in vitro and in vivo paradigms. ACHUCARRO is an international centre, so a proficient English level is a requisite for all the applicants.

Benefits

According to the profile of each person/ profile.
