Main functions, requisites & benefits

Main functions

How would you like to work as a consultant developer and administrator on a cloud based platform called ServiceNow? Due to the high demand for the skills and expertise provided by our company we decided to expand and open a branch in the Basque Country. Full training in ServiceNow will be provided as long as you have experience as a developer. A preference would be for people who have experience within the IT Service Management field. Knowledge of ITIL processes is an advantage. You will have the opportunity to get certified as a ServiceNow system administrator as part of the initial training. If travelling to client sites around Europe, expenses paid, sounds appealing to you then please apply for this position. Normally you will be working exclusively with one client for a 3 - 6 month period. There might be a possibility of working remotely depending on the clients.

Requisites

- Willing and able to travel to client sites when required

- Excellent problem solving skills

- Excellent communication skills

- Self motivated and able to work on your own initiative

- Also able to work as a team player when required

- High level of English, both written and oral

- Experience as a developer using JavaScript or other languages

- Knowledge of databases

- Tertiary education in IT or a related discipline

- Ability to provide a Police Clearance   Desirable skills and experience   - Experience in technical support or sales in a call centre

- Experience working in project with senior management through to end-users
