

Company Description

We are a research centre that specialises in industrial production and manufacturing technologies, and we are integrated into the IK4 Research Alliance. Our activity covers the identification and analysis of opportunities, the design and development of products, business lines and production processes and the resolution of problems through the provision of technological services such as technical consultancy and equipment based services. We are known for the scientific excellence developed in our 4 research groups which are aimed at advancing our specialisation. Our own organisational model encourages interdisciplinary work and we take special care in the qualification and professional development of our staff.
