

**Company  
Description**

At LKS Next Technology Consultancy we have been alongside our clients for more than 20 years helping them to develop the most advanced and innovative services and solutions. With this approach we make it easier for them to adapt themselves to the challenges of the new digital era. To continue with this vision, we are willing to expand our team with a Dynamics Business Central/ Navision Advisor, so we can continue with the growth of our team at Zuatzu.

LKS Selection &amp; Training Management

 LKS  
Next**Main functions, requisites & benefits****Main functions**

At LKS Next Technology Consultancy you will be part of the requirement collection from the client and you will be able to adapt the MS Dynamics 365 BC / NAV technology to their business model. Furthermore, you will also make functional analysis about MS Dynamics 365 BC/NAV developments and coordinate yourself with the technical department to assist them during the process. You will contribute your insights during the settings and the testing of the system. You will be close to the user during the training period and will help the client meanwhile the tool is starting. Finally, you will show our clients our demos during the pre-sales actions that you will coordinate.

**Requisites**

You will have a Degree on Business Administration, Computer Science, Organizational Engineering or similar. Your experience should be of at least 3 years within the following areas: Manufacturing, Project managing, and MS Dynamics 365 BC / NAV services. You will be able to communicate yourself in English, Spanish and is desirable that you speak Euskera.
