

Company Description

Join Accenture and help transform leading organizations and communities around the world. The sheer scale of our capabilities and client engagements and the way we collaborate, operate and deliver value provides an unparalleled opportunity to grow and advance. Choose Accenture, and make delivering innovative work part of your extraordinary career.

Accenture people build careers in four different areas of our business: Consulting, Technology, Outsourcing and internal Corporate Functions. Each area offers a unique career experience and a compelling mix of work and training opportunities, work environment and structure for career progression.

Technology professionals implement and lead highly complex technology projects. Working with clients, they design, develop and deliver innovative technology solutions that drive high performance. These professionals may build, test, install and maintain software across a variety of projects and industries, working with leading enterprise applications such as SAP, Siebel, PeopleSoft and Oracle or with custom-built applications, and they are involved in a wide range of challenging global technology projects.

Please also note that Accenture is an equal opportunities employer and welcomes applications from all sections of society and does not

Company

ACCENTURE

Main functions, requisites & benefits

Main functions

Currently Accenture requires to hire Business, Functional and Technical Consultants with 4-10 years of experience in SAP Retail , CAR (Customer Activity Repository), and/or Forecast & Replenishment for its office in Bilbao:

Key Responsibilities:

- Support on developing the expertise on SAP Retail, both at functional and technical level.
- Actively participate on the generation of SAP Retail enabled assets to foster the demand generation on this functional area.
- Participate on both, the business development and execution of projects enabled by the SAP Retail capabilities.
- Lead from functional or technical perspective:
 - Functional: design workshops, analyze business needs and requirements, identify and design business processes to be implemented on SAP, customize the modules, prepare and execute testing phase and provide UAT and user training support.
 - Technical: Solution architecting, integration for omnichannel solutions, expertise on new technical demands (Core Data Services, FIORI, Analytics,...)

Requisites

Requirements

- 4-10 years of experience in Retail process, or technical areas applicable to SAP Retail projects.
- Strong SAP Retail / SAP Technical background.
- High level of English is mandatory.
- Second language is a plus.
- Customer Activity Repository (CAR) knowledge is a plus.
- Forecast & Replenishment knowledge is a plus.
- Include on answer whether available for frequent international trips or only occasionally.
- Experience leading design or technical workshops, problem solving and team lead skills.

Benefits

What can we offer you?

- Immediate incorporation.
- Stable contract: we offer open-ended/indefinite contracts from the first day.
- To join a Company that's consolidated and shows a great international growth, in which the most important element are the people that belong to it.
- Compensation and professional category that recognizes the experience you provide.
- Interesting incentives and social benefits.
