Main functions, requisites & benefits

Main functions

We are looking for a talented individual with strong competence in leading and managing complex R&D projects. Experience and interest in the following will be highly valued: Actively participating in a Start-Up company. Interfacing with scientists and cutting-edge technology. Supporting the business development and helping to build up other areas of the company. Interest in developing an Industrial Doctorate (Candidates holding already a PhD will be evaluated too).

Requisites

Software Engineer/developer, or related degree in Computer Science with strong background in app development, database management and experience in Machine Learning, Artificial Intelligence and Big Data Analytics. Previous experience in projects with industry would be an asset. Excellent verbal and written communication skills (English). Willing and able to travel internationally. Available to start ASAP.

Benefits

We offer the possibility to collaborate in an innovative project in a highly technological field. This represents an excellent opportunity for personal and professional growth in an international oriented organization that has the potential to become a leader in the field.
