

**Company
Description**

At CLCircular <https://clcircular.com/> we develop traceability systems for logistics chains (especially cold-chain) through IoT devices. Our purpose is to reduce losses and waste of food and other perishable products, which in many cases are due to poor management of the cold chain. We export 99% of our sales, and we have subsidiaries in 3 countries in America, as well as an important Network of Distributors, which we are constantly expanding.

Information

 Deadline: 2020-08-31  Country: Basque Country
 Category: Business  City: Mungia
 Province: Bizkaia

Company

CLCircular

**Main functions, requisites & benefits****Main functions**

We seek to strengthen our technical team at our Mungia offices in Bizkaia, initially with a recently graduated person, with or without previous experience. The main tasks would be the maintenance, development and updating of our cloud platform. It is an opportunity to work on the development of a powerful communication platform with clients, contributing and participating in design decisions from the outset. The person who joins will have a direct relationship related to the cloud platform, both with the CLCircular team, and with customers and service providers.

Requisites

We need a person with an open and cooperative character. We are an expanding company and we consider good team relationships and customer relationship skills as very important. In addition, we demand the following knowledge: Degree in computer engineering, telecommunications or the like. WEB: CSS and HTML JavaScript (jQuery, Bootstrap) SERVER: C ++ (work with sockets and programming under linux will be valued). C ++ boost library. SQL databases (MySQL, MariaDB). Basic knowledge of Linux (preferably Ubuntu 18.04 although any distribution that comes from Debian is acceptable). GENERAL: Networking knowledge (IPV4 today). Apache web server administration. Database Administration MariaDB. Queue Service Management (RabbitMQ). Enough English to serve International Clients.

Benefits

CLCircular is a very Exciting Project due to both its Social Impact and Innovation Sides. We have an excellent work environment, with offices in the middle of the mountain, but fifteen minutes from the center of Bilbao and 5 minutes from the airport! We see clear prospects for growing, both at the company and personal career level, and we also make a great effort to reconcile our personal life with working in a start-up.
