BC3 Basque Centre for Climate Change

Main functions, requisites & benefits

Main functions

LIFE URBAN KLIMA 2050 is a European project with the participation of around twenty entities (including BC3), in the Basque Country. The main objective of the project relates to the implementation of the goals of the Basque Country's Climate Change Strategy KLIMA 2050, through the development of a series of actions and pilot projects over the six-year duration of the project. To this end, BC3, will contribute, among others, to the following areas: Policies of climate change and health at urban scale. Coordination (supervisor): Dr. Aline Chiabai Technical training of the public administration against climate change. Coordination (supervisor): Estibaliz Sanz Development of a climate change risk governance model adapted to the Autonomous Community of the Basque Country. Coordination (supervisor): Dr. Marta Olazabal The level of dedication in the different activities will vary throughout the contract period depending on the needs of the project and the established work schedule. This will be managed by the internal project coordinator at BC3. In general, and for each of these activities, the selected person will be responsible for (but not limited to): Review the state of the art, (including scientific and grey literature), and good practices of climate change and health policies at the urban level. Study of the competences and functions of the different public administrations in the Basque Country. Study of the competences and regulatory framework of urban planning in the Basque Country. Review and select suitable mechanisms for climate risk management and planning in the Basque Country. Prepare materials and support for the organization of events, workshops, seminars, surveys and interviews. Support in the creation of databases and technical analysis of the data collected. Contribute to the development of the deliverables and documents of the project. Communicate and coordinate with both technical and non-technical stakeholders, under the supervision of the task leaders. Assist in the internal coordination of BC3, as well as in the preparation of external dissemination materials. The selected person will be physically located in Leioa (Bizkaia) at the UPV-EHU Science Park, at BC3 facilities. The selected person will work under the direct supervision of Estibaliz Sanz (project coordinator at BC3), and in close collaboration with Dr. Aline Chiabai and Dr. Marta Olazabal, according to the needs of the project. The applicant is expected to comply with the standards of conduct and ethics imposed by the host institution (BC3).

Requisites
