**Main functions, requisites & benefits****Main functions**

Supervised learning for COVID-19 prognosis. The PhD Student will work on the research project "Early prognosis of COVID-19 infections via machine learning" funded by AXA Research Fund. The researcher will develop techniques for supervised classification based on minimax approaches and apply such techniques to predict the future severity of COVID-19 infections using medical health records. Candidates are expected to have strong mathematical background with experience on software languages for numerical computing such as Matlab and Python.

Requisites

Scientific Profile Requested Requirements: Promising young researchers. Applicants should have their MSc. completed before 31/10/2020. MSc. degree is required from mathematics, computer science or related area. Skills and Track-Record: Ability to effectively communicate and present research ideas. Previous experience in research projects is highly desirable. High level of spoken and written English. Good communication and interpersonal skills.
