Company

POLYMAT

Main functions, requisites & benefits

**Main functions**

The selected candidate is expected to: conduct researches, write papers, reports and proposals, establish international collaborations, be willing to undertake research stays abroad. The position involves supervision of undergraduate students and the development of a research project in the area of physically crosslinked hydrogels for protein delivery.

**Requisites**

Applicants must have a PhD (or equivalent) in Polymer Science, Chemistry, or Pharmacy, with a strong background in the preparation of functional hydrogels for drug delivery. Applicants should have a strong record of innovative scientific accomplishments as evidenced by first-author papers published or accepted in international recognized journals. Qualified candidates must also demonstrate outstanding communication skills, have a strong passion and commitment to science, and work well within a group. Good command of written and spoken English is a must (if preselected, a telephone or Skype interview will be carried out before any other appointment is made).

**Benefits**

POLYMAT has obtained the ‘HR Excellence in Research award’. The award reflects our commitment to continuously improve our human resource policies in line with the European Charter for Researchers, the Code of Conduct for the Recruitment of Researchers and our commitment to achieve fair and transparent recruitment and appraisal procedures.
