COMPUTER ENGINEER

Company Description

At CLCircular we develop digital traceability systems for logistic chains (especially cold-chains) through reusable IoT devices. Our purpose is to reduce losses and waste of food and other perishable products, which in many cases are due to a lack of visibility through the supply chain. We have reduced the cost per use of real-time monitoring technologies thanks to a circular econmy aproach, and thus allow to use of these technologies, not only in expensive products, but in every commodity. Despite being a startup, we export 99% of our sales, and we have subsidiaries in 3 countries in America, as well as an important network of distributors, which we are onstantly expanding.

CICircular

Main functions, requisites & benefits

Main functions

The main tasks would be the maintenance, development and updating of our cloud platform. It is an opportunity to work on the development of a powerful communication platform with clients, contributing and participating in design decisions from the outset. The person who joins will have a direct relationship related to the cloud platform, both with the CLCIrcular team, and with customers and external service providers.

Requisites

We need a person with an open and cooperative character. We are an expanding company and we consider good team relationships and customer relationship skills as very important. In addition, we demand the following knowledge: Degree in Computer Engineering, Telecommunications or the like. WEB: CSS and HTLM JavaScript (JQuery, BootStrap) SERVER: C ++ (work with sockets and programming under linux will be valued). C ++ boost library. SQL databases (Mysql, MariaDB). Basic knowledge of Linux (preferably Ubuntu 18.04 although any distribution that comes from Debian is acceptable). GENERAL: Networking knowledge (IPV4 today). Aapache web server administration. Database Administration MariaDB. Queue Service Management (RabbitMQ). Enough English to serve International Clients.

Benefits

CLCircular is a very exciting project due to both its social impact and innovation aspects. We have an excellent work environment, with offices in the middle of the mountain, but fifteen minutes away from the center of Bilbao and 5 minutes from the airport! We see clear prospects for growthing, both at the company and personal career level, and we also make a great effort to reconcile our personal life with working in a start-up.
