

Company Description

Ormazabal is the leading provider of personalized solutions to electrical utilities, to electrical end users as well as renewable energy systems applications based on its own technology. We encourage development within the electrical sector towards the challenges of the future energy needs. We cooperate with the world's leading local, regional and global companies in this sector, with a strong commitment to innovation towards personal safety, network reliability, energy efficiency, and sustainability. Our highly qualified and focused team of innovation motivated professionals have developed our own products and solutions during our more than a century long consolidated history, always by establishing close relationship with our customers aimed at achieving mutual long-term benefits.

Ormazabal

Main functions, requisites & benefits

Main functions

To complaint processing: troubleshooting and rectification on site. To carry out after-sales measures such as maintenance, repair and retrofitting. To commission & functional test of MV systems including secondary technology. To carry out protection tests and commission telecontrol components. To prepare service offers for existing plants according to the specifications of the sales department. To train and instruction customers and partner companies.

Requisites

Completed training in the field of power engineering or electrical power supply or as an electrician. 1 to 3 years of professional experience in service and handling, ideally experience in the field of SF6-insulated MV plants. Confident handling of electrical systems. Experience in the field of protection/ and telecontrol technology is an advantage. Good MS-Office skills. Knowledge of SAP or Salesforce an advantage. Driving license class B1. Knowledge of English. Willingness to travel. Confident, customer-oriented appearance. Independent, structured and solution-oriented way of working. Flexibility and enjoyment of regional and national assignments.

Benefits

Our team is open-minded and international, with short decision-making and communication paths. We place great emphasis on fair dealings with one another. We offer our employees individual development opportunities and training programs. During your detailed induction, you will get to know the products of our German and international business units and develop into a specialist for 36 kV systems. Take an active part in shaping the future of our company - we look forward to hearing from you!
