IC2021_11 POSTDOCTORAL FELLOW ON MODELLING THE REMAINING USEFUL LIFETIME FOR OFFSHORE WIND ENERGY TECHNOLOGIES

Company Description

BCAM is the Research Center on Applied Mathematics created with the support of the Basque Government and the University of the Basque Country, which aims to strengthen the Basque science and technology system, by performing interdisciplinary research in the frontiers of mathematics, talented scientists’ training and attraction, so the excellence of our results are recognized by the Society.

Information

Deadline: 2021-12-10
Category: Academia
Province: Bizkaia
Country: Basque Country
City: Bilbao

Main functions, requisites & benefits

Company

BCAM

Main functions

This work is framed in IA4TES – Inteligencia Artificial para la Transición Energética Sostenible project. This offer, in particular, is to work in Computational Mathematics area, where Machine Learning, Data-Driven Computing, Numerical Simulation, Degradation Models, Transfer Learning, Offshore Wind Energy topics will be worked. PI in charge: Vincenzo Nava, David Pardo

Requisites

Applicants must have their PhD completed before the contract starts. PhD in Mathematics and/or Civil, Mechanical, Industrial, Offshore Engineering or similar areas. Skills: Good interpersonal skills. A proven track record in quality research, as evidenced by research publications in top scientific journals and conferences. Demonstrated ability to work independently and as part of a collaborative research team. Ability to present and publish research outcomes in spoken (talks) and written (papers) form. Ability to effectively communicate and present research ideas to researchers and stakeholders with different backgrounds. Fluency in spoken and written English. Scientific Profile: Experience in reliability modelling of the remaining useful life for components/subsystems/systems using Bayesian approaches. Experience in degradation modelling. Experience in machine learning techniques and in particular in Transfer Learning problems. Experience in treatment of long time series. Experience in simulation of long time series. Good programming skills in Python and R. Interest and disposition to work in interdisciplinary groups. The candidate would preferably be in possess of: Experience in the sector of offshore wind energy, or offshore oil and gas, or structures in offshore environment.

Benefits

The gross annual salary of the Fellowship will be 28.000 - 32.000€. It will then be on your own responsibility to make your yearly income declaration at the Bizkaia Treasury Agency. Free access to the Public Health System in Spain is provided to all employees. Contract and offer: 1 year + 1 year (based on performance evaluation)
