JAVASCRIPT DEVELOPER

Company Description

At Developpair we are currently looking for a key member of our team: a Javascript Developer, who will drive the implementation of our main product, and thus accelerate the growth of the company. Developpair was founded almost 3 years ago, with the purpose of radically improving the way software is being developed on cyber-physical systems. We are building a SaaS platform that automates as much as possible the development process of such systems, and we have a multidisciplinary team with talent in various fields: software engineering, embedded systems, artificial intelligence and formal verification methods, among others.

Company

Developpair Technologies

Main functions, requisites & benefits

Main functions

We have been developing a prototype web application for our platform for some time, and the time has come to make a qualitative leap and give it a commercial quality, in addition to adding new features. For this we need the contribution and enthusiasm of a developer like you. You will be contributing to the design and development of the web application, and we want you to grow professionally with us.

Requisites

Required: Passion for software development. Ability to write quality code. Experience in Javascript, CSS and Html. We value: A Bachelor's or Master's degree in Engineering, Mathematics or equivalent. Knowledge of Python. Advanced level of English. Skills: Desire to learn continuously and ability to do so quickly. Proactivity. Teamwork skills. Self-management skills.

Benefits

We have a continuous workday every Friday of the year, and flexibility to adjust the start and end of the workday on a daily basis. Our office is located in San Sebastian, and those of us who live nearby have a hybrid work model. For people who do not live nearby and have the desire and ability to contribute to our project, a full-remote work model can be considered. You will have 26 working days of vacation, and we have flexibility to enjoy them. You will work hand in hand with the Developpair team, from the founder to your colleagues in product and technology development, and soon with the new incorporations that you help to define. We offer a competitive salary, which we will agree based on your level of experience.
