

Company Description

CIC energiGUNE is a R&D centre specialized in energy, electrochemical storage (batteries and supercapacitors), thermal energy solutions and hydrogen, a member of the Basque Research and Technology Alliance- BRTA, and, a strategic initiative of the Basque Government. CIC energiGUNE was created in 2011 to generate excellent knowledge and at the same time useful for the Basque business network, being a reference in knowledge transfer. CIC energiGUNE has launched its second spin-off Basquevolt. Basquevolt is a new and ambitious project that aims to be the European leader on solid state batteries. Main functions, requisites & benefits

Main functions

JOB DESCRIPTION: In the context of the Basquevolt project, the centre is seeking a Basquevolt R&D Projects Coordinator. This person will report to the management of Basquevolt and will join the company after a previous training period at CIC energiGUNE. The candidate will join a very dynamic structure and will be responsible for leading the management of granted R&D projects from the conception of the idea to its closure. **FUNCTIONS:** In-depth knowledge and monitoring of R&D&i funding calls and selection of those to which to apply competitively. Management of national and international consortiums. Support in the preparation of proposals and justification of the activities to be carried out. Preparation, monitoring and control of budgets. Support in the management of framework agreements with companies and contracts with the administration. Coordination and administrative monitoring tasks to meet project milestones, in close collaboration with Basquevolt staff and collaborating organisations. Other delegated functions.

Requisites

Preferably a technical degree (engineering, chemistry or similar). Other degrees (business administration or similar) will be taken into account, depending on the candidates' profile and their experience in R&D&i project management. Experience of at least 5 years in R&D consultancy firms, research centres or companies with activity in energy storage in similar functions. Less experience will be valued depending on the quality of the same. Proven experience in managing big consortium and complex R&D projects, both in the EU, national and regional frameworks. Experience in the energy storage sector and in the field of batteries would be highly valued. Ability to work in a team, management skills and proactivity. High level of spoken and written English. Daily professional use.

Benefits

We are offering a permanent contract to join an innovative and cutting-edge project, oriented towards sustainability, value creation, generation of collaborative ecosystems where the development of people and diversity is promoted. CIC energiGUNE and BASQUEVOLT are located close to the city of Vitoria-Gasteiz (Spain), in the heart of the Basque Country. The Basque Country is the region with the highest R&D investment in Spain, with more than 20.000 researchers. The basque research ecosystem comprises a solid and collaborating community composed of universities, technology and cooperative research centers which leads the return per capita in the European H2020 program.
