

Company Description

AIC is a European open innovation centre for the mobility sector, working as a unique partner for companies to improve their competitiveness through cooperation. 30 companies from ten different countries and 1000 highly qualified professionals are based at the centre. In order to encourage and consolidate cooperation, companies locate their innovation, training, R&D or industrial development activities at the AIC facilities. They work independently but also in coordination in order to come up with projects of common interest in a broad range of areas, such as electrification, manufacturing, system integration and digitisation, among others.
