

## Company Description

TE Connectivity is a global industrial technology leader creating a safer, sustainable, productive, and connected future. Our broad range of connectivity and sensor solutions, proven in the harshest environments, enable advancements in transportation, industrial applications, medical technology, energy, data communications, and the home. With more than 85,000 employees, including over 8,000 engineers, working alongside customers in approximately 140 countries, TE ensures that EVERY CONNECTION COUNTS. Learn more at [www.te.com](http://www.te.com) and on LinkedIn, Facebook, WeChat and Twitter. TE's Medical business unit, part of the Industrial Solutions segment, offers medical device OEMs a complete product offering and capability portfolio for minimally invasive imaging, surgical, diagnostic, and therapeutic devices. With more than 350 design engineers and a global presence in all key medical device hubs, we are a premier partner to the world's leading medical technology companies for their next-generation medical devices. We are experts in all aspects of device design and manufacture from access & delivery solutions for interventional medicine to sensors & connectors for surgical applications. Our innovative solutions enable ground-breaking medical therapies such as treating heart disease without opening the body, placing microscopic devices into brain arteries, and powering robotic surgery. The IVD Solutions

## Main functions, requisites & benefits

### Main functions

We are looking for a Head of Quality to lead the quality function at our Mondragon site reporting to the Global IVD Solutions Quality Leader. What you will be doing... Maintain and contribute to management process improvement aligned with ISO 13485, ensuring efficiency and continuous improvement. Plan, coordinate, and participate in internal and external audits. Support the definition and monitoring of site KPI's and preparation of management reports. Coordinate the implementation of management system reviews and updates according to internal and external needs and ensuring standards compliance. Work with other site functions (Sales and Marketing, Product Development, Project Management, Transfer to Manufacturing, and Manufacturing, and supporting functions) and global IVD team to build awareness and conduct training on quality and regulatory matters.

### Requisites

What your background should look like... University degree in technical field. Master's degree or professional certificates in Quality and/or Management Systems will be a plus. Strong leadership, communication, and organizational skills. Able to work with autonomy. Desire for continuous improvement. Customer oriented. Experience of at least 3-5 years in similar roles, including product development and manufacturing activities, preferably in Medical Device, Chemical or Pharma industry. Advanced level of English

### Benefits

A stable job position in a company with international environment and an attractive salary package with professional growth opportunities based on qualifications.
