

Company Description

Biobide is a biotech company that aims to help our customers worldwide developing solutions to improve productivity in the Drug Discovery process, integrating zebrafish animal model with innovative tools, adding value to their R+D+i mainly in the preclinical area (toxicology, safety and efficacy). We have developed capabilities based on zebrafish and omics to help pharmaceutical and biotech companies to decrease withdrawals in the Drug discovery and development process. At the end, saving cost and time and obtaining higher revenues from their investment. We are able to set up zebrafish toxicity, safety and efficacy assays, to be used in the very beginning of the process, and to ensure investing in the most successful drug candidates, due to their efficacy or safety. Our assays combine advantages from in vitro and in vivo assays. We can offer a High Content Screening (HCS) based on our automation capability, but in vivo with the whole zebrafish embryo, giving highly qualitative information.
