Company

FASTBASE SOLUTIONS

Main functions, requisites & benefits

Main functions

FASTBASE Solutions are seeking a hardware engineer with experience in research and development and with solid knowledge of microscopy hardware and/or OEM optics. The principal goal will be to help FASTBASE with the development of novel microscopy devices based on its proven QF-Pro® technology. You will be responsible for designing, testing, and transitioning OEM parts into the fullscale manufacturing of high-reliability, safety-critical products. This will include high-quality design implementation; adherence to hardware standards and processes; and implementation of existing architecture efforts. Work will be carried out in tandem with our software engineers.

Requisites

The role requires a prior experience related to electro-mechanical design, analysis, and implementation. The desired candidate should be highly driven and able to work both independently and also within a diverse team. Must hold a relevant degree (biotechnology, physics, engineering etc) and have had experience with OEM optics and microscope design.
