BACKEND SOFTWARE ENGINEER

Company Description

Nabla wind hub is a wind energy independent solution provider, that offers to the market the most advanced composite components, sensorics, analytics and engineering services, counting on commitment and competences to win and deliver long-term big-scale deals. Through our own combined technologies and global patents, nabla wind hub is a pioneer international reference for end-to-end wind energy solutions, focusing on three strategic industry aspects: life extension, performance improvement, and maintenance optimization. Furthermore, nabla wind hub promotes diversity, as our co-workers come from different nationalities and the diversity helps us reflecting, learning, and improving the services that we offer. So, we are willing to incorporate in our team a Backend Software Engineer.
