

Company Description

BCMaterials, Basque Center on Materials, Applications and Nanostructures, is an autonomous research center launched in June 2012 by Ikerbasque, the Basque Foundation for Science and the University of the Basque Country (UPV/EHU) as a research center for Materials, Applications and Nanostructures. The Center is included in the BERC's (Basque Excellence Research Centers) Network, and its mission is to generate knowledge on the new generation of materials, turning this knowledge into (multi)functional solutions and devices for the benefit of society.

BCMaterials

Main functions, requisites & benefits

Main functions

We are looking for post doctorate level researchers in the area of materials engineering and emerging solar cells. The hired researcher will develop new semiconductors and its integration for tandem perovskite solar cells. The work will be carried out at BCMaterials and will enjoy collaboration with leading research group. The starting date is as soon as possible, and for experience researcher competitive salary will be paid and are at par with other EU scientific establishments.

The hired researcher will work in an regional-funded research project, and collobrate with Industry, University and Technical center aiming to develop new thin-film solar cells technology which is beyond silicon. Work program / Duties / Responsibilities A full-time post-doctorate position (one year) exists for researchers within the research domain of emerging solar cells in a cutting-edge research group at BCMaterials. BCMaterials is an independent research centre, active in functional materials located near Bilbao in the Basque Country, north of Spain.

The post-doctorate fellow will be responsible for laboratory experiments, fulfilling the project objectives, Interacting with Industrial partners, result dissemination. Writing reports, and scientific articles on the research results. For the successful candidate, the position represents an excellent opportunity to develop both a collaborative and personal scientific research career, exploiting the capabilities of energy materials, semiconductors, and photovoltaics. Other relevant information Collobration with Industry and relevant stake holder exists. Please apply by sending the application along with the name of 2-3 scientific referees and support letter.

Requisites

The position requires

- A Ph.D. in Materials Science, Chemistry or chemical engineering
- A very high level of motivation and independent thinking abilities
- Solid and demonstrated experience in perovskite solar cells fabrication and device engineering
- Good publications record as the first author in prestigious scientific journals
- Proficiency in English, good interpersonal, and presentation skills, team player, and the ability to meet deadlines are also required.
