Company

CIC nanoGUNE

Main functions, requisites & benefits

Main functions

We invite applications for a group-leader position in the field of nanomedicine, with a focus on medical diagnostics, therapeutics, and/or device technology, including biomedical engineering. Of particular interest are research areas with connection to technology and with applications of interest for the medical community. A thematic overlap with at least some of nanoGUNE's already existing research groups would be desirable.

Requisites

Candidates should have: An outstanding track record of impactful work in nanomedicine The potential to attract public and private funding at the highest level. A track record of successful collaborative research with companies and/or medical practitioners will be highly valued. Proficiency in spoken and written English is compulsory.

Benefits

In addition to a start-up package, we offer an international and competitive environment, an excellently equipped state-of-the-art infrastructure, and the possibility to perform top-class research. We promote teamwork in a diverse and inclusive environment, and we welcome applicants without regard to disability, gender, nationality, race, religion, or sexual orientation. Female candidates are particularly encouraged to apply.
