

## Company Description

Who we are AEG Power Solutions is a worldwide leader in power supply and power conversion technologies for industrial and renewables applications. We design and provide our solutions to blue chip customers on large projects for power generation, infrastructures, nuclear, renewable energy and oil & gas processes. Our 800 employees operate in 15 countries with a strong European and Asian footprint. Our company is considering fantastic opportunities to grow both organically and through acquisitions in our traditional sectors but also in adjacent technologies. We are specifically targeting the energy storage and green hydrogen applications with our truly unique capabilities. In order to evaluate these opportunities and design our growth strategy, the GM for our factory in Vitoria is looking for:

## Main functions, requisites & benefits

### Main functions

Supply Chain Manager Vitoria As our new Supply Chain Manager for our entity in Spain you will coordinate, organize, and control the Supply Chain Team and all activities involved in the management of the relationship with our suppliers to ensure the continuous flow of the operations of our Factory. You'll manage every stage of the purchase of components, raw materials and third party systems in close coordination with Engineering and Production planning to best serve the contractual commitments with our customers till the delivery of the complete scope of supply and final products. Main Responsibilities: Work with procurement managers and buyers to source the right products. Implement the sourcing strategy in the local entity, in close coordination with the Global Sourcing Team. Negotiate contracts with suppliers and customers. Plan and implement logistical strategy, ensuring targets are met. Use computer software to track goods from origin to delivery (SAP). Work on forecasts and inventories, keeping an accurate record of the process and analyzing performance. Manage the costs involved while maintaining quality. Ensure you're aware of exactly what is happening throughout the supply chain. Manage and motivate a team of supply chain staff. Improve the overall supply chain performance and look for any possible innovations to the process. Develop new and existing relationships with suppliers. Manage and minimize the risks (for example operational or reputational) that could affect or interrupt the supply chain.

### Requisites

Qualifications and Requirements: Ideally educational background in Logistic/Supply Chain or Engineering. At least 8-10 years of experience working for a Supply Chain department for a manufacturing company, ideally at multinational level. High level of English (B2). Strong planning skills. Good time management, with the ability to work under pressure, maintain accuracy and keep to deadlines. The ability to solve problems and make decisions, as well as to think strategically and laterally. Excellent relationship management skills, with the ability to work collaboratively with internal and external teams. At least 2-3 years of experience managing teams

### Benefits

We offer an excellent opportunity for professional development in a historic company, with an extraordinary brand recognition, market leadership and global presence. The location of the factory also provides a privileged working environment, as well as stable, flexible and highly competitive labor conditions.
