Main functions, requisites & benefits

Main functions

We are looking for a Risk Manager. Risk Manager is responsible for the systematic application of policies, procedures, methods, and practices to the tasks of identifying, analyzing, evaluating, treating and monitoring risks and opportunities. Responsibilities: Identify and document the characteristics of all risks that might affect the project. Analyze, evaluate and quantify risks by: Performing qualitative analysis of risks and conditions to prioritize their effects on project objectives. Evaluating probability and consequences of risks and quantifying their implications on project objectives. Control risks by developing and implementing a mitigation strategy for each risk that is recorded in a risk register. The mitigation strategy with identified owner and risk allowance would: Tolerate the risk by not doing additional work Terminate the risk by eliminating the cause Treat the risk by undertaking work Transfer the risk by transferring to relevant third-party Monitor risks and mitigation strategies by conducting formally scheduled reviews at key project milestones. Report risk status to stakeholders, providing consistent recording of information.

Requisites

Experience: 10 years in of construction management / 3 years in risk management in infrastructure construction projects Physical location during the term of the Agreement: Israel or Spain.

Benefits

At CAF T&E we are committed to equal opportunities, since we believe that diversity adds up. We work to create an inclusive work environment, ensuring non-discrimination based on sex, age, color, religion, disability, sexual orientation, or gender identity in all our Human Resources' policies. We make our hiring decisions based on your experience and skills.
