## Information

 Deadline: 2023-10-15  Country: Basque Country  
 Category: Business  City: Vitoria-Gasteiz  
 Province: Araba / Alava

## Company

CIC energigUNE

## Main functions, requisites & benefits

### Main functions

CIC energigUNE is seeking a Laboratory Technician to work in the prototyping line assembling the different components of a cell for solid state batteries. Job functions: Components processing and cell assembly. Identify and implement improvements in the cell assembly process. Collaboration with other team members. Area: Electrochemical energy storage (EES) Research group: Cell prototyping

### Requisites

Degree or vocational training as Laboratory Technician or in Chemistry, Electrochemistry or related fields. Ability to identify and solve technical problems. Proficiency for quickly learning new skills or field of study. Good verbal skills in English. Demonstrated self-motivation and ability to work independently. A good team player who can collaborate with other team members.

### Benefits

12-months contract and professional development opportunities. Flexible working hours and with the option of hybrid distance/on-site work model. Full access to cutting-edge laboratory facilities and characterization platforms. The incorporation to a top research center in Europe that makes high quality research and impactful contributions to the energy and sustainability fields. Professional and personal development: opportunity to attend seminars, international conferences, trainings, etc. Integrated, enthusiastic, international and multidisciplinary environment. A welcome program that offers help with finding accommodation and addresses other aspects to help you integrate into the local environment (such as free language courses, assistance with the administrative procedures...).
