

Company Description

Coben Group is a company focused on the one hand in providing consulting services (financial, business development, etc.) to both startups and ecosystem agents (Diputations, startup accelerators, etc.); and on the other hand, we invest directly in startups in early stages both with its own capital and through Coben Ventures. We are three partners who come from the world of entrepreneurship and our passion is to be at the side of entrepreneurs helping them develop their projects. We do this both by providing financial services, business development, etc. and by investing in startups through Coben Ventures (collective investment vehicle). We define ourselves as restless people, with a proactive spirit who move away from conformity by seeking to launch new initiatives with which to improve our work and innovate.
