

Company Description

DIVE Medical is a Health Tech Startup founded in February 2020 by a passionate team devoted to making early eye care a reality. With our proprietary technology based on eye tracking and artificial intelligence, we provide an automatic, fast, and accurate exploration of the visual function even in non-verbal patients. Being able to examine vision from six months of age and in patients unable to cooperate for neurocognitive issues, we want to generate a high positive impact and allow everyone to live at their full potential.

Main functions, requisites & benefits

Main functions

To analyze, prioritize, and translate customer needs into ideas for product development. To develop the product roadmap, prioritizing features and initiatives based on strategic fit, customer feedback, internal shareholders feedback, market trends, and ROI. Clearly articulate the product vision, objectives, and requirements to engineers and developers using the necessary technical language. To provide detailed and clear documentation, including product specifications, flowcharts, and any other necessary materials. To establish and monitor KPIs to measure the success and impact of product initiatives, ensuring alignment with overall business objectives. To help to build and mentor the product management team, fostering a culture of collaboration, and continuous improvement. To create a culture of decision-making based on insight, analysis and data across the business.

Requisites

At least, 5 years of experience as Product Manager or in a product management team directly reporting to the CPO. Experience in the healthcare sector will be highly valued. Excellent command of Spanish and English language and grammar, both verbal and written, will be mandatory.

Benefits

Opportunity to be part of the multidisciplinary team of managers, clinicians, and computer engineers building a company to transform health through excellence in technology and knowledge. Create a positive social impact, as well as a great economic impact, offering more accessible, early and egalitarian global health. Dynamic, ethical, enthusiastic, and international professional environment where we all commit and share openly in order to achieve a greater purpose. Partly remote and flexible schedule.
