VAILLANT GROUP

Main functions, requisites & benefits

Main functions

As Automation Test Engineer (m/f/d) you will take an active part in the energy transition by qualifying novel functions for Vaillant heating systems in the environment of our IoT solution to offer our customers maximum comfort and energy efficiency. As part of a cross-functional Scrum team, you will plan and execute functional and security-related IoT tests for product qualification and release, and be responsible for evaluation and documentation. To conceptualize, operate and optimize the test environment required for the products and take over the development and maintenance of automated tests. To support the error analysis and correction and takeover responsibility for the product.

Requisites

You have successfully completed studies in computer science or electronics or similar. You have strong knowledge in the field of software testing and test automation, ideally in the field of IoT products or web based and mobile applications. You are familiar with professional SW development process, continuous integration, and continuous deployment as well as with version control systems such as Git. You have professional skills in Python and ideally knowledge in Robot, Maestro, or other testing frameworks. Knowledge in Jira x-ray as well as ISTQB-Certification are a plus. Due to your very good English, your communication skills as well as your open and trustworthy personality, you communicate confidently on all levels. You are a team player and bring a long assertiveness, an independent as well as strategic way of thinking and working, analytical talent, paired with high conceptual skills.

Benefits

We are pioneers in R&D, with highly efficient products in the field of renewable energy, with environmentally friendly technologies that help us to reduce CO2 emissions. We work with a sustainable conscience and are committed to equal opportunities for women and men. Corporate values are very present in our day-to-day work (entrepreneurial spirit, trust, integrity and passion). The company is concerned about work-life balance, with measures such as flexible working hours and teleworking. The working environment and the team spirit are excellent.
