

### Company Description

Do you have technical knowledge of electricity? Are you interested in testing electrical equipment? Achieve long-term security and stability! STM, a company within the Voltia group, allows you to access the best conditions and stability due to its solid positioning in the market. We are national leaders in High Voltage maintenance, and we want to share with you the opportunity to work as an Electrical Testing Technician. The three fundamental pillars upon which the work of STM and COVER are built are: ensuring high-quality, reliable, and value-added electrical service that meets all the needs of the clients. At VOLTIA, continuous training of its personnel is encouraged to have a highly specialized and experienced workforce that carries out all tasks exceptionally. VOLTIA provides security and confidence to both its clients and the two companies integrated into this shared project.

Selección y RRHH grupo VOLTIA

### Main functions, requisites & benefits

#### Main functions

To perform tests outlined in our portfolio of activities and services. To analyze and develop acquired data. To collaborate optimal interdepartmental communication.

#### Requisites

It is required technical knowledge of electricity: industrial engineering or any other field that allows you to acquire fundamentals of electricity. You will need availability on weekends and holidays: we provide service at optimal times for the client, which may involve hours different from the usual ones. Communicative skills will be very valuable: ability to convey and comprehend messages from the client to ensure a bilateral communication channel. The job development and the selection process will be conducted in Spanish.

#### Benefits

The opportunity to develop your professional profile hand in hand with a company established in the market. Immerse yourself fully in the world of substations and other high-voltage installations. Gain highly specialized knowledge within a sector with high demand and great future prospects. Furthermore, you can rely on a long-term employment relationship in the Basque Country, which will provide stability for pursuing your personal projects. Benefit from additional conditions such as a company car, mileage reimbursement, combined field and office work. Negotiable salary based on experience.
