Main functions, requisites & benefits

Main functions

We are looking for people who are passionate about challenges and who want to be part of a project for the future. Committed, innovative, proactive people with a vocation for service and teamwork. You will be part of the Operations team at Lantek and will be responsible for the coordination of internal programmes and tools across multiple projects to ensure alignment with the organisation's objectives. The main duties are: To organize programs and activities in accordance with the mission and goals of the organization. To develop new programs to support the strategic direction of the organization. To design, implement and improve processes continuously. To communicate with the different offices and departments to coordinate improvements in corporate processes. To design, implement and analyze KPIs and business metrics to identify improvement activities. To implement management tools and applications. To create and manage objectives associated with KPIs. To produce accurate and timely reporting of program status throughout its life cycle. To expand tools and applications offering and enhancing the quality of existing ones.

Requisites

Degree in Mechanical Engineering, Computer Engineering, Telecommunications, Industrial Engineering or similar. MBA or similar specialization studies are valued. A certification in Project Management (such as PMP certification) will be valued. Experience in Project Management will be an asset. Experience in Team Management will be an asset. Experience working with and parameterizing ERP systems as well as project management, service, and BI tools. Knowledge of JIRA. On a personal level, we think of a profile with excellent analytical and time management skills; ability to work in a team and solve problems by applying knowledge to find solutions; initiative and creativity.

Benefits

Permanent contract. Hybrid work format. Flexible working hours. Work in a benchmark company in its sector that is constantly committed to innovation. Participation in the development of high-level technological projects. Being part of a dynamic and highly qualified work team. If you want to join a dynamic corporation in a period of strong expansion, within a sector with great potential for development at a global level, here is your best opportunity! We are waiting for you!
