Main functions, requisites & benefits

Main functions

As part of the development and updating of our global operations, we are currently recruiting a Director Project Minerals, with regional responsibility for delivering capital projects >EUR 1 million in Western and Southern Europe (Spain, Portugal, France, Italy and Turkey). The Director Projects will have a portfolio of medium sized projects, some of which he/she will manage him/herself, and some will be managed by local PMs reporting to him/her. The Director Projects will be responsible for and coordinate the entire life cycle of the assigned projects, from scope definition and resource planning to commissioning, as well as making sure all projects are managed in an ownership mindset, adding value and making sure integrity is good. With the support of the "Design" and "Electrical + Automation" Engineering teams during the design phase, you will also ensure sound project planning, budgeting, scheduling, resource management / organization, as well as the risk assessment / mitigation. You will also cooperate and be supported by the Procurement Team to ensure a robust sourcing strategy.

Requisites

With an engineering background in a heavy industrial environment (mining/minerals, cement, aggregates, etc.), you must have experience in overseeing various greenfield and brownfield industrial projects, where minerals technology is a key element. With at least Bachelor's Degree in Engineering (Mechanical Design, Process Automation, Electrical Design or Civil Design), you will also have a formal Project Management training and at least 10 years' experience in an industrial environment (preferably mining/minerals but also construction, cement or aggregates), within a global industrial organisation. You will also have strong business acumen, will need a sound understanding of project evaluations, as well as being able to interpret an NPV model. Fluent French and English are vital for this role. Spanish is also good, as the role will be based in Bilbao, Bizkaia, Basque Country, Spain.

Benefits

Hybrid working conditions and flexible schedule. It is an opportunity for you to join a truly growing global business. Other benefits will be discussed at interview stage. We have set clearly defined sustainability priorities and targets, with key environmental and social objectives, which include Health & Safety, Climate & Energy, Community Engagement, Human Rights and Business Ethics.
