

Company  
Description

CIDETEC is a technology centre that brings together three leading international centres in the fields of Energy Storage, Surface Engineering and Nanomedicine. For more than 25 years, we have been working with leading companies to develop technology that makes the world a better place. A cutting-edge, diverse and international centre awaits you!

## Information

Deadline: 2025-08-01  
Category: Business  
Province: Gipuzkoa

Country: Basque Country  
City: San Sebastián

## Company

CIDETEC

**cidetec**  
a greater future today

## Main functions, requisites &amp; benefits

## Main functions

CIDETEC Surface Engineering is looking for a person to join Coatings and Surface Treatments Unit, to reinforce the line of degradation phenomena monitoring with non-destructive techniques, addressing major challenges to respond both to industrial demands and European programmes. If you want to be part of this revolution, we are waiting for you! CIDETEC is an international leader in research and innovation related to surface engineering in the fields of Coatings and Surface Treatments, Polymers and Composites, and Nanosurfaces. We specialise in the treatment of surfaces and materials with state-of-the-art technologies. The researcher will work in activities related to the development of R&D projects focused both in basic research and industrial development in close contact with the most prominent companies in sectors such as aeronautics, automotive and energy. Your contribution You will join a cutting-edge research centre, focused on sustainability and circular economy, which has spent years understanding and revolutionising the surfaces of components, from those we touch every day in our homes or our vehicles, to the most demanding materials for sectors such as aeronautics and energy. You will work on research and/or company transfer projects, carrying out your work in such a way that you are able to pursue several research lines simultaneously, optimising resources and maximising results. Your work will focus on the following activities: Reinforcement and promotion of the monitoring of degradation phenomena line. Management and implementation of R&D projects. Analysis of results, drafting reports and preparing presentations. Direct interaction with clients. Writing of scientific articles European, national and regional proposals preparation

## Requisites

Education: Master degree in physics, materials science, Industrial Engineering, Materials Engineering or equivalent. Languages: Fluent in spoken and written English. Knowledge: The successful candidate will demonstrate a sound knowledge in: Development of degradation phenomena monitoring methodologies based on Acoustic Emission. Analysis of acoustic emission data Degradation phenomena of materials and coatings (corrosion, wear, ...) Knowledge and experience of the following will be considered a plus: Knowledge of other NDT methods. Work experience both in academic and industrial sector Knowledge of other foreign languages Observations: A highly motivated person, with a keen interest in research and innovation, you will join a multidisciplinary team. You will be able to organise your work, meeting both the deadlines and the established objectives. Problem-solving capacity and scientific criteria. Good communication skills, both verbal and written. \*We positively value applications from people with a disability equal to or greater than 33%, in compliance with current legislation, the General Law on the Rights of Persons with Disabilities and their social inclusion (LGD).

## Benefits

At CIDETEC you will be able to develop your career alongside a team of top-level professionals, in a young yet committed environment, dedicated to innovation and seeking to provide practical solutions that result in a more sustainable world. Professional
