

**Company  
Description**

CIDETEC is a technology centre that brings together three leading international centres in the fields of Energy Storage, Surface Engineering and Nanomedicine. For more than 25 years, we have been working with leading companies to develop technology that makes the world a better place. A cutting-edge, diverse and international centre awaits you!

**Information**

 Deadline: 2025-08-01  
 Category: Business  
 Province: Gipuzkoa

 Country: Basque Country  
 City: San Sebastián

CIDETEC

 cidetec  
a greater future today**Main functions, requisites & benefits****Main functions**

CIDETEC Surface Engineering is looking for a person to join Coatings and Surface Treatments Unit, for the development of ceramic coatings and enamels with high resistance to extreme environments, tackling major challenges to respond to both industrial demands and European programmes. If you want to be part of this revolution, we are waiting for you! CIDETEC is an international leader in research and innovation related to surface engineering in the fields of Coatings and Surface Treatments, Polymers and Composites, and Nanosurfaces. We specialise in the treatment of surfaces and materials with state-of-the-art technologies. The researcher will work in activities related to the development of R&D projects focused both in basic research and industrial development in close contact with the most prominent companies in sectors such as aeronautics, automotive and energy. Your contribution You will join a cutting-edge research centre, focused on sustainability and circular economy, which has spent years understanding and revolutionising the surfaces of components, from those we touch every day in our homes or our vehicles, to the most demanding materials for sectors such as aeronautics and energy. You will work on research and/or company transfer projects, carrying out your work in such a way that you are able to pursue several research lines simultaneously, optimising resources and maximising results. Your work will focus on the following activities: Reinforcement and promotion of the coatings for extreme environments research line Management and implementation of R&D projects. Analysis of results, drafting reports and preparing presentations. Direct interaction with clients. Writing of scientific articles European, national and regional proposals preparation

**Requisites**

Education: PhD in Chemistry, Materials Science, Chemical Engineering, Materials Engineering, Industrial Engineering or equivalent. Languages: Fluent in spoken and written English. Knowledge: The successful candidate will demonstrate a sound knowledge in: Development of ceramic coatings with high resistance to extreme environments. Characterization of the coatings resistance at high temperature and chemically aggressive environments. Knowledge and experience of the following will be considered a plus: Knowledge in coatings characterization techniques (XRD, FESEM, wear and corrosion resistance.) Experience in heat treatments Work experience both in academic and industrial sector Work experience in different countries Knowledge of other foreign languages Observations: A highly motivated person, with a keen interest in research and innovation, you will join a multidisciplinary team. You will be able to organise your work, meeting both the deadlines and the established objectives. Problem-solving capacity and scientific criteria. Good communication skills, both verbal and written. \*We positively value applications from people with a disability equal to or greater than 33%, in compliance with current legislation, the General Law on the Rights of Persons with Disabilities and their social inclusion (LGD).

**Benefits**

At CIDETEC you will be able to develop your career alongside a team of top-level professionals, in a young yet committed
